RE: Modification to City of Dyersburg Landfill Operations Manual

Date: February 25, 2020

The following modification will be required to our standard operating procedures regarding the use of the tarp system in lieu of dirt as daily covering of waste at the Landfill.

1. The tarp is to be used at the current working face only for daily cover and does not alleviate the landfill from having to place daily, intermediate or final cover as and when required by the Tennessee Solid Waste Processing and Disposal Rules (Division Rule 0400-11-01) unless alternate provisions have been approved in writing by the Division;
2. The tarp shall be inspected daily for damage;
3. The use of the tarp as an ADC shall cease or must be replaced whenever the tarp is damaged in such a manner that it can no longer function as an ADC;
4. The tarp must be removed from the current working face at the beginning of each working day;
5. A soil cover consisting of a minimum of 6 inches of compacted soil must be placed on the current working face on the last landfill working day of each week;
6. Should the active working face location change prior to the last landfill working day of a week, the previous active working face shall be covered with a minimum of 6 inches of compacted soil cover by the end of the working day on which the active face location changes;
7. Under no circumstances shall a tarp be used to cover waste for 24 consecutive hours or longer;
8. This approval of the use of a tarp as an ADC may be rescinded by the Division at any time due to compliance issues related to the use of the tarp.

RE: Notice of Deficiency on Minor Modification to Use a Tarp as an Alternate Daily Cover
City of Dyersburg Class I Landfill
SNL 23-0218

Dear Mayor Holden:

On December 27, 2019 the Division of Solid Waste Management (DSWM) received a minor modification request to use a tarp as an alternate daily cover (ADC) submitted by Greg Wilson for the City of Dyersburg Class I Landfill, SNL 23-0217. On January 15, 2020, the DSWM met with the City of Dyersburg and your engineer to discuss deficiencies with the minor modification. During the meeting, we discussed with the City that the review of the minor modification had been halted.

This letter is to memorialize the meeting and remind the City of Dyersburg of the items that need to be addressed before review of the minor modification can continue. Specifically, the City of Dyersburg needs to include the following information in the minor modification:

1. The size(s) of the tarp(s) to be utilized by the landfill;
2. Updated operation manual pages that outline the conditions or times that the landfill will utilize tarps and the tarp deployment procedures the landfill will utilize; and
3. Limitations on the use of tarps at the landfill. Recall a list of limitations put on other landfills was provided during the meeting and has been attached to this letter as well.

As stated above, review of this minor modification has ceased until the deficiencies discussed in the meeting and itemized above have been addressed. If you have any questions or comments concerning this correspondence, please contact me by email Clifton.Jeter@tn.gov or by phone (731) 512-1341 or Mr. Reese Yontz by email Reese.Yontz@tn.gov or by phone (731) 512-1376.

Sincerely,

R. Clift Jeter

R. Clift Jeter

2. The tarp shall be inspected daily for damage;
3. The use of the tarp as an ADC shall cease or must be replaced whenever the tarp is damaged in such a manner that it can no longer function as an ADC;
4. The tarp must be removed from the current working face at the beginning of each working day;
5. A soil cover consisting of a minimum of 6 inches of compacted soil must be placed on the current working face on the last landfill working day of each week;
6. Should the active working face location change prior to the last landfill working day of a week, the previous active working face shall be covered with a minimum of 6 inches of compacted soil cover by the end of the working day on which the active face location changes;
7. Under no circumstances shall a tarp be used to cover waste for 24 consecutive hours or longer;
8. This temporary approval of the use of a tarp as an ADC may be rescinded by the Division at any time due to compliance issues related to the use of the tarp.
9. This temporary approval of the use of a tarp as an ADC ceases on December 31, 2019; and
10. A copy of this temporary approval must be maintained in the landfill scale house.

A permanent approval may be requested after successfully completing the trial approval with no compliance issues related to the ADC.
