Dyersburg, TN 38025-1358

RE: Approval of Minor Modification to Use a Tarp as an Alternate Daily Cover
City of Dyersburg Class I Landfill
SNL 23-0218

Dear Mayor Holden:

On December 27, 2019, the Division of Solid Waste Management (DSWM) received a minor modification to use a tarp as an alternate daily cover (ADC) submitted by Greg Wilson for the City of Dyersburg Class I Landfill, SNL 23-0218. On January 15, 2020 the DSWM met with you and other representatives of the City of Dyersburg to discuss the request and a notice of deficiency (NOD) was issued on February 28, 2020 to commemorate the discussions in that meeting. On May 29, 2020, Scott Ball submitted a response to that NOD.

After reviewing the minor modification request and response to the NOD, the DSWM hereby approves the use of a tarp or tarp system subject to the following conditions stated in the request:

1. The tarp is to be used at the current working face only for daily cover and does not alleviate the landfill from having to place daily, intermediate or final cover as and when required by the Tennessee Solid Waste Processing and Disposal Rules (Division Rule 0400-11-01) unless alternate provisions have been approved in writing by the Division;
2. The tarp shall be inspected daily for damage;
3. The use of the tarp as an ADC shall cease or must be replaced whenever the tarp is damaged in such a manner that it can no longer function as an ADC;
4. The tarp must be removed from the current working face at the beginning of each working day;
5. A soil cover consisting of a minimum of 6 inches of compacted soil must be placed on the current working face on the last landfill working day of each week;
6. Should the active working face location change prior to the last landfill working day of a week, the previous active working face shall be covered with a minimum

of 6 inches of compacted soil cover by the end of the working day on which the active face location changes;

7. Under no circumstances shall a tarp be used to cover waste for 24 consecutive hours or longer; and
8. This approval of the use of a tarp as an ADC may be rescinded by the DSWM at any time due to compliance issues related to the use of the tarp.

Please ensure a copy of this approval is stored with permit documents and operating record maintained for the landfill.

If you have any questions concerning this correspondence, please contact Reese Yontz at (731) 512-1376 or by email at Reese.Yontz@tn.gov.

Sincerely,

R. Clift Jeter
