---

TDEC Permit No.: NRS23.237
Corps Permit No.: MVM-2023-242
PE # 24S222-S1-003
PIN: 132132.04
State Route 222, from near Hebron Drive to near Thorpe Drive (including the I-40 Interchange, Exit 42) (Project Blue Oval)
Fayette County

Due to changes to the design on the project, an addendum to the permit application is required. The addition of a control access fence has resulted in some additional temporary impacts to WTL-3A and WTL-5A. Attached is the addendum application package.

Since the new impacts are temporary, this should not impact the initiation of the TDEC Public Notice.

The appropriate TDOT Divisions are being sent the application package for informational purposes. If the plans are revised or new information becomes available indicating impacts to environmental features (e.g., streams, wetlands, springs, etc), TDOT Environmental Division, Permits Section, will be notified immediately.

If you have any questions or we can provide further assistance, please contact me or Brian Lee at (615) 297-8957.

Thanks,

Robbie Stephens | C.E. Manager 2
