

CONSTRUCTION PERMIT SUMMARY REPORT

Company Name: IMI Tennessee, LLC dba imi TN, LLC - Livingston File Number: 67-0059 EPS Initials: AJP
Permit Number(s): 981733 (081733) Source Point Number(s): 01
Application Received (date): 8/25/2023 Application Complete (date): 9/05/2023
Air Quality Analysis Performed? Yes No

Briefly describe the project: (new source, modifications) (what the process is) (type controls proposed) (emissions expected, qualitative) (replacing what sources) (background information)

SIC Code 3273 – Ready-Mix Concrete

This concrete batch plant operation (Source 01) is an existing air contaminant source. The purpose of this application is to add baghouse to silos (disconnecting from central dust collector) and increase annual production. The process of this existing source involves the production of concrete using one cement storage silo, two cement supplement storage silos, a weigh-batcher/weigh hopper, discharge chute for truck loadout, conveyors, and other associated equipment. The concrete batch plant increased the maximum production limitation to 50,000 yd³ during any calendar year period while in operation. The fabric filters at the silo vents, and a dust collector at the weigh-batcher/weigh hopper and the discharge chute/truck loadout are the emission control device systems used for controlling Particulate Matter (PM) during concrete production from the concrete plant while in operation.

Per the application, this permit is to be issued a combined construction/operating.
