**Subject:** 2019 Biosolids General Permit Coverage

Good Afternoon,

I was reviewing the requirements to receive coverage under the 2019 Biosolids General Permit on behalf of Mosheim WWTP. I am unable to locate a 2018 annual report or the additional necessary requirements. I will need to see verification of recent lab results for pollutant limits, pathogen reduction, vector attraction reduction, agronomic loading rate calculation, and PCB and TCLP results (if older than 5 years).

Thank you,
