Jimmy

The 2017 monitoring report shall be qualitative only. The report shall focus on the buffers (disturbed or intact) , signs are up, information on invasive species and on species of special concern such as the sun dew. Any observations on hydrology, especially the creation area.

Also, the attached Notice of Land Use Restrictions shall be placed on the mitigation site. I believe that the boundaries represented in Figure 3 of the 2016 report are adequate. GPS is satisfactory

Hi Mike,

I hope you are doing well. We are beginning to plan for the 2017 growing season at the Bledsoe County Correctional Complex stream and wetland mitigation site. We were wondering if you have any comments, recommendations, or suggestions regarding the 2016 (Year 5) monitoring report for the site. We are particularly interested in your thoughts about the recommendations discussed in the conclusions.

Thanks very much,
Jimmy
