Date October 27, 2023

Re: Transmittal of Preliminary Engineering Report
Cowan Utility District, Franklin County
Wastewater Project Number 23.0583
Project: Sewer System Rehabilitation

Receipt is acknowledged on October 4, 2023, of the above-referenced preliminary engineering report. The project is associated with permit TN0021644 and consists of cleaning, televising and smoke testing of the collection system to determine areas for rehabilitation and i/i reduction.

The scorecard identified critical needs of aging infrastructure and inflow and infiltration. The project intends on targeting older areas of the system suspected of deteriorated piping.

The Engineering Services Unit has no objection to the chosen alternative. The facility should upload this memo and approved files to their ARP grant file.

To expedite matters the engineer should reference the assigned ARP number with future submittals for this project. If we may be of any assistance, please feel free to contact Tim Hill, PE at 865-365-9535 or timothy.hill@tn.gov
