**Attachments:** NR2405.030 ARAP GP NOC.pdf

Good morning,

The Division of Water Resources (the Division) has received your Notice of Intent (NOI) to be covered under the **Bank Armoring and Vegetative Stabilization** general aquatic resource alteration permit (ARAP). The Division acknowledges receipt of the most recent version of the application for the above referenced project on 07/03/2024. After review, the application was deemed to be complete on 07/05/2024. We have reviewed your proposal to Bank stabilization of approximately 250 linear feet of Wolf River Lateral J using Scourlock and Armormax. Enclosed is the Notice of Coverage (NOC) with the permit tracking number [NR2405.030](#) which authorizes the work as proposed.

Pursuant to the Tennessee Water Quality Control Act of 1977 (T.C.A. §§ 69-3-101 et seq.) and supporting regulations the Division of Water Resources is required to determine whether the activity described in the attached Notice of Coverage will violate applicable water quality standards. This permit may also serve as a federal section 401 water quality certification (pursuant to 33 U.S.C. § 1341). The 401 Water Quality Certification Justifications and Citations related to the procedural requirements of §121.7(d) can be found [here](#). A paper copy of the certifications and justifications can also be obtained by contacting [Water.Permits@tn.gov](mailto:Water.Permits@tn.gov) or calling (615) 532-0359.

This activity is governed by the General Permit for Bank Armoring and Vegetative Stabilization issued pursuant to the TWQCA. The work must be accomplished in conformance with accepted plans, specifications, data and other information submitted in support of application NR2405.030 and the terms and conditions set forth in the general permit.

Stabilization activities must be limited to areas with actively, excessively eroding stream and reservoir banks. Please note that unnecessary vegetation removal is prohibited. Adequate erosion controls must be installed prior to construction and maintained during project construction. All disturbed areas must be revegetated or otherwise stabilized with native vegetation upon completion of construction. The use of monofilament-type erosion control netting or blanket is prohibited. Written notification of the commencement of authorized work shall be provided to the local TDEC Environmental Field Office prior to, or within 24 hours after initiation of the approved work. A copy of this permit, approved plans, and any other documentation pertinent to the activities authorized by this permit should be maintained on site at all times during periods of construction activity.

### **Annual Maintenance Fee and Termination of Permit Coverage**

Permittees will be assessed an annual maintenance fee of \$350 for coverages that exceed one year. Please note that this maintenance fee does not grant the right to extend coverage past the expiration date of the general permit. Permittees may terminate coverage prior to the expiration date by submitting a completed [Notice of Termination \(NOT\)](#) form, which is available on [the division's webpage](#). A complete NOT

should include photodocumentation of the finished project area. The Division will notify the permittee that either the NOT was received and accepted, or that the permit coverage is not eligible for termination (due to existing deficiencies) and has not been terminated.

In order to get a copy of the Bank Armoring and Vegetative Stabilization general permit, we ask you to visit TDEC's [webpage](#). We will provide you with a printed copy of the general permit **only** upon your request.

At our [ARAP website](#), you will find links to this and other general permits, guidance documents, and links to relevant web sites. If you do not have access to the web, or have other questions, please contact Memphis [Environmental Field Office](#) or call us at 1-888-891-TDEC.

We appreciate your attention to the terms and conditions of this general permit for aquatic resource alteration.

Sincerely,  
Division of Water Resources

Brooke Grace  
Administrative Services Assistant  
Division of Water Resources
