**RE: 6000E Parking Lots – New Sanitary Sewage Lift Station & Associated Lines  
Oak Ridge National Laboratory Permit Number: TN 0002941  
Roane County**

Dear Ms. Jones,

UT-Battelle, LLC, Management and Operating Contractor for Oak Ridge National Laboratory pursuant to Contract No. DE-AC05-00OR22725 with the Department of Energy (“DOE Prime Contract”), has approved the design of the above referenced project consisting of a new sanitary sewage lift station, including 1,138 ft of new HDPE force main (6”). The new lift station design capacity is 400 gallons per minute (GPM). Additionally, a new manhole will be installed upgradient of the new lift station that will tie in existing sanitary lines. A 12” PVC gravity line will exit the new manhole and discharge into the new lift station. UT-Battelle, LLC agrees to operate and maintain the proposed project once in operation pursuant to UT-Battelle’s DOE Prime Contract. We have conducted an analysis and determined the system has adequate capacity and that the project will not create or exacerbate any overflow problems.

Sincerely,

9/6/23

Bart Hammontree  
Interim Director, Laboratory Modernization Division

Robert N. Baugh  
Director, Utilities Division
