RE: 2017 Sludge Report

Dear Mr. O'Dette:

In order to comply with the Tennessee Biosolids Permit and Tennessee rules, the Town of Mosheim Wastewater Treatment Plant reports the following information on wastewater sludge disposal via land application. In the year 2017, the Lick Creek Valley Wastewater Treatment Plant did not apply any biosolids via land application. We are having to landfill our biosolids temporarily due to elevated levels of molybdenum. The dry result of our sludge is 80.1 and the limit for land application is 75. We are in the process of sampling lift stations in our system to determine where it is coming from.
