Good Morning Oscar,

I just received the comments back from our corporate office last Friday. Thank you for your patience with us. We have found no issues with the draft permits provided, other than the language reflecting that stormwater samples must begin within the first 90 days of permit issuance. We feel this sampling would not provide much benefit as the stormwater samples were just collected this past year. If we could revert back to the previous permit language stating that they must be collected within the permit cycle, we would appreciate that. Please let me know if you have any questions or issues with our stance on the timeline of SW samples.

Thank you,

Ryan Hennessey

Good evening Ryan,

I wanted to follow up on the status of the permit comments for Arconic North and South Plants. My goal is to get them issued by the end of the month, pending any comments received. If the only comment is related to the timeframe for biomonitoring we already discussed, please let me know and the previous email may be used as a formal comment. Please let me know if you had any questions.

Thank you,

Oscar Montenegro | Environmental Protection Specialist

Ryan,

As the permit is written, yes the stormwater monitoring would be required within 90 days of the permit issuance or after the first qualifying storm event if there are no events in that 90 day period. However, to be consistent the DMR schedule from the previous permit (biomonitoring submitted in 2022) this can be edited in the final permit to simply be once per permit cycle if you submit a formal comment asking this be changed. Please let me know if you have any other questions.

-Oscar

Oscar,

A question on the wording within this permit. Biomonitoring requirements for stormwater (Section 3.3) states “ **The toxicity tests specified herein shall be conducted once per permit cycle and begin no later than ninety (90) days from the effective date of this permit, or as soon thereafter as practicable during a qualifying storm event.**”. Does this mean that all tox tests for stormwater must be collected within the first 90 days of the permit issuance? It is unclear that the requirements would be once per permit cycle (5 years), but with the caveat of additionally within the first 90 days. Can you provide some clarity?

Thank you,

Ryan Hennessey

Mr. Weida,

Enclosed please find a draft copy of the NPDES permit which the Division of Water Resources proposes to issue. This draft copy is furnished to you solely for your review of its provisions. No wastewater discharges are authorized by this draft permit. The issuance of an official permit is contingent upon your meeting all of the requirements of the Tennessee Water Quality Control Act and the Rules and regulations of the Tennessee Water Quality, Oil and Gas Board.

Also enclosed is a copy of the public notice that announces our intent to issue this permit. The notice affords the public an opportunity to review the draft permit and, if necessary, request a public hearing on this issuance process. If you disagree with the provisions and requirements contained in the draft permit, you have thirty (30) days from the date of this correspondence to notify the Division of your objections. If your objections cannot be resolved, you may appeal this permit upon issuance. This appeal should be filed in accordance with Section 69-3-110 of the Tennessee Code Annotated.

If you have questions, please contact your Environmental Field Office at 1-888-891-TDEC, or you may contact me at (615) 532-0623 or by email at oscar.montenegro@tn.gov.

Thank you,
