RE: ADM Grain Company – Memphis
Dredge Permit Application
Archer Daniels Midland (ADM)
1811 Dock Street
Memphis, TN 38113

To whom it may concern,

ADM Grain Company would like to request a project description modification to dredge permit number NRS16.099-21. Currently, the facility is permitted to perform maintenance dredging at the facility's dock located on McKellar Lake where dredged material is to be disposed via floating pipeline to the existing contained disposal site on Treasure Island.

Due to seasonal increases in production, time restraints, extremely low river levels impinging navigation within McKellar Lake and the difficulty in locating a hydraulic dredge, ADM Grain Company is requesting authorization to perform emergency maintenance dredging at the facility's dock by use of a barge crane. Approximately 1,500-3,000 tons of material will be removed by clamshell and emptied onto a work barge. This material will be moved by barge from the dredge site across the Mississippi River to Treasure Island.

If you have any questions or require further information on this, please contact Molly Fitting at (901) 208-5739.

Sincerely,

Simeon Wright
Operations Superintendent
