

V. Laboratory

Byerley Construction Company, Inc. is monitoring and sampling the stormwater retention lagoon. If needed we will change the wording of this report to be in compliance with testing the water.

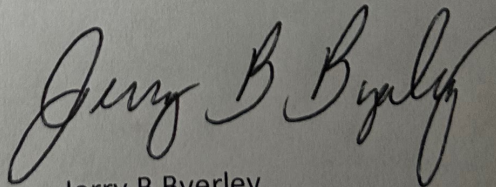

VI. Pollution Prevention and Storm Water

We will study other deficiencies related to this program in the areas you have detailed and work on pertinent areas of this report. In addition to all of the concerns and recommendations noted during the inspection, we are working on each one of them that has been brought to our attention, such as the monthly inspections to be performed on site during operations.

VII. Conclusion

Being a upstanding member of the community for many decades, we would not want to do anything to hurt the downstream fish, qualify of marine life or water quality for our community. We, Byerley Construction, will do all we can to protect our environment. We are and will continue to work on shortcomings to ensure permit compliance with NPDES Permit #TNG110140.

Sincerely,

Jerry B Byerley
President
