Re: City of Mount Juliet
County: Wilson
Water Resources Number 12-0389
Project: Ellenwood Farms, Phase 3, Section 1

Dear Michael:

The Tennessee Department of Environment and Conservation, Division of Water Resources, acknowledges the receipt of four (4) sets of plans for this project on August 2, 2012.

The project consists of the construction of approximately 610 linear feet of 8-inch gravity sanitary sewer and appurtenances.

Approval is granted in accordance with certain requirements of the Water Quality Control (WQC) Act of 1977 and Regulations of the Water Quality Control Board. **The SITE set of plans and specifications will be stamped with the APPROVAL and APPROVAL EXPIRES STAMPS on the cover sheets only. Any indication of tampering with the bound set of documents will be subject to investigation and prosecution.** One complete set of construction documents, bearing the official stamp, must be kept at the construction site.

Approval expires one year from the stamped approval date unless construction is either underway or complete. Any request for extension must be made prior to this expiration date. Significant deviations from the approved plan documents must be submitted and approved in writing before such changes are made. Minor changes made during construction need not have prior written approval. Modifications, however, may be required by this Department should the changes be deemed inappropriate. It is advisable, therefore to obtain prior approval in cases where the significance of the change is uncertain.

The Division of Water Resources is authorized to inspect the construction work to verify compliance with the approved plans and specifications, which are on the site. **Therefore, the engineer shall notify Mike Thornton of the Water Resources Office at the Nashville Environmental Field Office (615) 687-7127 (Mike.Thornton@tn.gov) of the start of construction.**

Approval of these construction documents should not be construed as a permit for any activities related to this project. Activities which may require a permit under the WQC Act and Regulations include, but

Mr. Michael Dewey, P.E.

are not limited to, the following: stream bank vegetation removal; creek crossing(s) for equipment or utility lines; construction within twenty (20) feet of a stream bank; construction in or near a marshy area or wetland, and/or land disturbance greater than one acre.

Additionally this approval does not authorize connection and use of sewer that will cause or contribute to collection system overflow or overload of the receiving wastewater treatment facility. The Water Resources Office previously referenced should be contacted for determinations regarding whether modification of the existing NPDES or SOP permit, an Aquatic Resource Alteration Permit (ARAP) and/or a National Pollutant Discharge Elimination System (NPDES) Construction Storm water permit will need to be obtained prior to the beginning of construction of this project.

To expedite matters, please reference the assigned Water Resources number on any future correspondence. If we may be of any assistance, please feel free to contact us either by phone (615) 532-0358 or by e-mail at Phil.Simmons@tn.gov.

Sincerely,

Philip M. Simmons, P.E.
Manager, Municipal Facilities Section
