RE: Review of Request for Minor Permit Modification
Side Slope Modification Phase F-2
Yarnell Demolition Class III Landfill
Knox County, Tennessee
DML # 47-0069

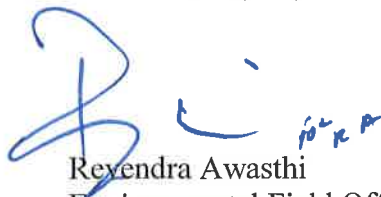

Dear Mr. Anderson:

The Division of Solid Waste Management has reviewed the requested modification to raise the western side slope of Phase F-2 as presented by SCS Engineers on December 5, 2017. This modification represents a loss of airspace equal to the volume of waste placed along the south boundary late this past summer. The boundary distance was adequate however the slope was steeper than the necessary grade which resulted in airspace gain. This minor modification provides an acceptable base grade and is hereby approved. The site will need to test and submit a certification report for this area after the additional fill is placed prior to placing waste in the area against that slope. This minor modification closes the violation issued concerning the cell with no additional enforcement measures considered at this time. The Division appreciates your efforts to survey and design adjusted cell limits so waste volumes were ultimately offset.

If you have any questions, please do not hesitate to contact me at (865) 594-5474.

Sincerely,

Paula Plont
Environmental Consultant
Division of Solid Waste Management
