**Request for Waiver
Testing and/or Monitoring of Effluent
EPA Application Form 2C**

[Requirements found in 40 CFR 122.21 (g) or (k)]

Company Aggregates USA (Locust Mount), LLC
 Minename Locust Mount Quarry
 NPDES TN00 66010

Only one sample needs to be collected from outfalls where effluent quality is substantially identical. However, where effluent quality varies, additional samples must be collected.

Check the boxes that apply and fill in the information, where applicable.

Submit three copies. One copy must have the original signature of the permittee.

Outfall effluent quality varies. Samples were collected and tested for outfalls:

Outfalls _____ have substantially identical effluent quality.

Outfalls _____ have substantially identical effluent quality.

Outfalls _____ have substantially identical effluent quality.

This is my request to the Director to allow the testing of one outfall. Outfalls for my facility have substantially identical effluent quality.

This is my request to the Director for a waiver from the testing and reporting of the parameters: Biochemical Oxygen Demand (BOD), Chemical Oxygen Demand (COD), Total Organic Carbon (TOC), Ammonia (as N), and Temperature. Testing and reporting of these parameters do not provide information essential to NPDES permit issuance.
