> RE: Draft of NPDES Permit No. TN0064670
>   Town of Chapel Hill
>   Chapel Hill, Marshall County, Tennessee

Dear Ms. Swaney:

Thank you for giving us an opportunity to review the draft copy of the subject permit. Our comments are as follows:

1. The daily maximum BOD, 5-day, 20 C concentration limit (00310) for the 0.33 MGD SBR Facility was lowered to 23.3 mg/L. The permit issued August 2, 2022, had this limit as 40 mg/L. We request that the concentration limit remain at 40 mg/L.

2. A daily maximum BOD, 5-day, 20 C mass limit (00310) for the 0.33 MGD SBR Facility was established. We request this parameter be removed entirely.

We appreciate being able to talk through permit specific conditions with you and do not hesitate to contact Greg Davenport at Wauford if you have questions (gregd@jrwauford.com).

Yours very truly,

TOWN OF CHAPEL HILL, TENNESSEE

Danny Bingham
Town Administrator
