Ask TDEC your question (Please provide Web address, if applicable)

The City of Waynesboro is in the planning stages of building an additional water tank to add to its public water system. We have submitted the PER for the project through the portal. We will be disturbing more than an acre during construction so a General NPDES will be required. What other permits will be required and will Clean Water inspect before this tank is put into use?

Thanks,
Jeff Minatra Project Manager
