RE: Annual Storm Water Monitoring 2018
Fleischmann's Yeast
NPDES Tracking Number: TNR050564
Shelby, Tennessee

Dear Mr. Ellis:

The Tennessee Department of Environment and Conservation, Division of Water Resources' records indicate that the above referenced facility has coverage under the TN Multi Sector Permit (TMSP). The Standard Industrial Classification (SIC) code for this facility determines which Sector of the TMSP the facility must follow. Based on this facility's SIC code, the TMSP Sector(s) requires annual storm water sampling of the storm water runoff from the site.

If you have not already collected a storm water sample for the year 2018 and submitted the results to the Division, this email serves as a courtesy reminder that a storm water sample for the year 2018 is required to be collected prior to the end of the calendar year. The sample results should be submitted to the Division on the Annual Storm Water Monitoring Report form within 30 days of receipt of the sample results to the following address:

The Memphis Environmental Field Office
Division of Water Resources
8383 Wolf Lake Drive
Bartlett, TN 38133

A copy of the Annual Stormwater Monitoring Report form (CN-1115) may be found on the Division's website at <https://www.tn.gov/content/tn/environment/permit-permits/water-permits/npdes-permits/npdes-stormwater-permitting-program/npdes-industrial-stormwater-general-permit.html>. If you have already collected a sample and submitted the results to the Division, we appreciate your diligence in complying with this permit requirement.

Please contact Don Rautine at (901) 371-3027 or don.rautine@tn.gov for further assistance, if you have any questions.

Sincerely,

Joellyn Brazile
Environmental Program Manager
