RE: SR76 Industrial Access Utility Relocation

Permit Number: City of Bells, DW TN0000045, Crockett County

Dear Ms. Jones,

The City of Bells approves the design of the above referenced project consisting of the relocation of water, sewer, and gas lines for the relocation of SR76 being completed by the Tennessee Department of Transportation. To relocate SR76, several local streets will be demolished, with new connections made to the proposed roadway. Utilities will be relocated on SR76, Central Street, High Street, Weddle Street, Mitchell Avenue, Hick Street, and Belle Meade Street. The Town agrees to own, operate, and maintain the proposed project once in operation. Our Representative (A2H, Inc.) conducted an analysis and determined the system has adequate flow and pressure for the design flow rate and that the project will not negatively impact existing customers or overall utility systems in general.

Sincerely,

Eric Jordan

Mayor

City of Bell, Tennessee
