Re: Transmittal of Preliminary Engineering Report
Waynesboro Water System (PWSID TN0000736), Wayne County
ESU Project Number: **DW20240262 (HQ1-Y1A2-GQDTQ)**
ARP Project Number: **2022-8303 DW-PDC-2**
Project: **City of Waynesboro Wayne St. Water Line Replacement**

Receipt is acknowledged, on March 6, 2024 for the above referenced Preliminary Engineering Report. The project is associated with PWSID No. TN0000736.

The chosen alternative, Alternative 1, generally consists of the replacement of approximately 1,000 linear feet of 2-inch cast iron with PVC water line, reconnecting 13 existing service lines, valves, and all related appurtenances.

This PER references PDC-2, however the SWIG/ARP report only lists PDC-1 (water storage tank). However, the SWIG/ARP report does not include PDC-2 for the above referenced ARP No. 2022-8303. The City of Waynesboro will need to request a change for the PDC-1 application to include the water line replacement project, or present an application for PDC-2.

The Engineering Services Unit has no objection to the chosen alternative.

The engineer should upload the PER and this memo to GMS as part of the ARP process. To expedite matters the engineer should reference the assigned ARP grant application ID with future submittals for this project. This project is subject to review by SWIG for compliance with project scope and grant requirements. If we may be of any assistance, please feel free to contact Ms. Souraya Fathi at (615) 981-5531 or by E-mail at Souraya.Fathi@tn.gov.

Final construction documents should be submitted to ESU for review and approval through My TDEC Forms.
