Re: Public Notice NRS 21.032

APPLICANT: AAA Cooper Transportation c/o John Roberson
1751 Kinsey Road
Dothan, AL 36303

Robert,

As per the description that I have received, AAA Cooper Transportation proposes to install three stream crossings and two stormwater outfalls along an unnamed tributary to John's Creek (Stream 1), one stormwater outfall along an additional unnamed tributary to John's Creek (Stream 2), and 300 linear feet of bank stabilization and one stormwater outfall along a third unnamed tributary to John's Creek. The applicant proposes to purchase 173.6 functional-foot compensatory stream credits from Rossville Farms Mitigation Bank to offset the loss of stream resource value.

The Tennessee Wildlife Resources Agency has reviewed the information that you provided regarding the proposed project listed above. This project is to involve three unnamed tributaries to John's Creek in Shelby County at 4920 Hickory Hill Road, Memphis, Shelby County Latitude: 35.0142, Longitude: -89.8620. It is the opinion of the Tennessee Wildlife Resources Agency that the crossings, the outfalls, and the bank stabilization will not pose potential negative impacts to listed species under our authority. We also agree that the purchase of the stream credits is sufficient to offset the loss of stream resource value.

Thank you for the opportunity to review and comment on this proposed project. If you have further questions regarding this matter, please contact me at 731-298-6144.

Sincerely
