Subject: 2019 Biosolids General Permit

Good Afternoon Mr. Buford,

The Division of Water Resources has reviewed the submitted documents to receive coverage under the Biosolids General Permit on behalf of Baxter Wastewater Treatment Plant. The PCB and TCLP results are acceptable, but we will need to see the most recent lab results for metals analysis, fecal coliform geometric mean results, SOUR test, and agronomic loading rate spreadsheet.

Please let me know if you have any questions.

Thank you,

Anastasia Sharp, E.I. | Environmental Protection Specialist II
