RE: **Pretreatment Technical Assist Visit (TAV)**  
Camden HCR Lagoon and Spray Irrigation  
NPDES Tracking No: TN0064611  
City of Camden  
Benton County

Mr. Tuck:

On March 28, 2024, as a representative of the Tennessee Department of Environment and Conservation, Division of Water Resources, I performed a routine compliance inspection of the above referenced facility to evaluate the City of Camden's compliance with pretreatment program requirements of NPDES Permit TN0064611. The Division thanks you for your time and assistance. Please see the sections below for details regarding the inspection.

### **I. Permit**

NPDES Permit No: TN0064611 authorizes City of Camden Wastewater Treatment Facility to discharge treated municipal wastewater from Outfall 001 into Cypress Creek receiving waters at mile 12.8. The permit was effective on December 1, 2023 and expires on November 30, 2028.

### **II. Pretreatment**

Currently, there are no industrial users discharging to the plant. The City of Camden continues to maintain an active status under the NPDES permit should a future industrial user begin discharging. The required documentation is being maintained, necessary reports are being submitted, and you're consistently communicating with TDEC personnel to remain in compliance with the City of Camden's pretreatment program.

**Pretreatment Technical Assist Visit (TAV)**

Camden HCR Lagoon and Spray Irrigation

**III. Conclusion**

Compliance with permit TN0064611 requirements helps ensure discharges that are protective of downstream fish and aquatic life and water quality. Thank you for your efforts to ensure permit compliance and to protect state water quality. If I may be of assistance in matters concerning this report, please contact me via telephone at 731-571-0440 or via email at [John.Lay@tn.gov](mailto:John.Lay@tn.gov).

Sincerely,

John Lay

Environmental Protection Specialist
