Subject: **NPDES Construction General Permit Tracking No. TNR122260**
 Master Tracking Number TNR122260
 Redmond Farms
 Jack Redmond
 McKenzie, Carroll County, Tennessee

Dear Mr. Redmond:

The Division of Water Resources (the division) acknowledges receipt of the Notice of Intent (NOI) form for the above referenced project. The NOI was received on September 5, 2019. The NOI was submitted to obtain coverage under a General NPDES Permit for Storm Water Discharges Associated with Construction Activity.

A review of the submitted form showed that the NOI was incomplete. We have assigned this project NPDES Permit tracking number TNR122260. No discharges of stormwater associated with construction activity are authorized by the general permit until the completed NOI is submitted and Notice of Coverage (NOC) issued by the division.

Storm Water Pollution Prevention Plan (SWPPP)

The division acknowledges receipt of your SWPPP as fulfillment of the SWPPP submittal requirement for this construction site. However, the SWPPP was found not to satisfy requirements stated in part 3 of the General Permit. EPSC measures should be certified for a 5yr/24hr storm event. Also, please include north arrows on all maps and drawings.

Contractor Information

The division does not normally transmit a copy of this letter to your contractor(s). You should make sure that all contractors listed on the NOI are aware of the General Permit requirements.

Receiving Stream not Supporting Designated Uses

The receiving stream for the construction site for which the NOI was submitted appears on the state's list for partially supporting or for not supporting a stream's designated use due to siltation. Since the discharge from the proposed construction site may contain significant amounts of silt, the division considers the potential for degradation to the receiving stream from the discharge to be significant. Therefore, the additional pollution prevention requirements described in subpart 5.4 of the General Permit are applicable to your construction site; requirements of section 5.4.2. apply only if the stream is located on or adjacent to the disturbed area..

Receiving Stream not Supporting Designated Uses

The receiving stream for the construction site for which the NOI was submitted appears on the state's list for partially supporting or for not supporting a stream's designated use due to siltation. Since the discharge from the proposed construction site may contain significant amounts of silt, the division considers the potential for degradation to the receiving stream from the discharge to be significant. Therefore, the additional pollution prevention requirements described in subpart 5.4 of the General Permit are applicable to your construction site; requirements of section 5.4.2. apply only if the stream is located on or adjacent to the disturbed area.. We appreciate your attention to the general construction stormwater permit and its requirements. We believe this does make a difference to the quality of state waters. If you have any questions, please contact Mr. Brian Wallace at (731) 512-1365 or by e-mail at *Brian.Wallace@tn.gov*.

Sincerely,

Conner Franklin
Environmental Program Manager
