Hello Derek,

I have reviewed your comment and checked my calcs. regarding the emissions limitation for PM at the silicon grinding operation and agree. I have updated the commitment letter, but it will be a couple weeks before it can be signed because our site manager is out until the 21st of September. Once he has signed it upon his return to the office, I'll send it right over.

Thanks,
Jeremy

Jeremy,

That's fine I'll be out of the office from Wednesday through Tuesday on vacation as well. Once I have the new letter I'll add it to the permit and send for final review prior to issuance.

Thanks,

Derek Briggs, E.I. | Environmental Protection Specialist 2

Hello Derek,

I am traveling through Thursday for work, but should be able to review the emission information you stated below by the end of the week.

I have the filter to emission i.d. information also for the operating permit, but need to format it slightly and will send it over also.

Thanks,
Jeremy

Good morning Jeremy,

In review of the most recent Agreement Letter it appears as if you are being overly restrictive. Calculations at 0.005 gr/dscf with a combined flow rate of the 2 baghouses at 17,300 cfm give a 0.74 lb/hr and 3.24 TPY emission limit. Please update the agreement letter and we can get this construction permit issued.

Thanks,

Derek Briggs, E.I. | Environmental Protection Specialist 2
