**Subject:** Crossville, Inc. dba Plant 1 - Facility ID: 18-0086 - Additional information requested

Dear Mr. Briggs,

As you requested, all of your active operating permits shall be consolidated into one permit.

The following information is requested to process your application:

For each source (each permit), please provide calculations of UN-CONTROLLED MAXIMUM emissions (without any limitation or control system), for each criteria air pollutants (PM, SO<sub>2</sub>, CO, VOC, NO<sub>x</sub>, and HAPs emissions). Your calculations must include the basis of your calculations (AP-42 emission factors, or test data....). The emissions shall be provided on hourly and yearly (8760 hours/year) basis. The Division desires to review your calculations, so please list all factors used for the calculations and avoid cross referencing. Your calculations must include emissions from “insignificant” sources too. The status of your application will be “incomplete” pending the receipt of the requested information.

Please call or email with any questions. And, please confirm the receipt of this email when you received.

Sincerely,

**Younes Aleali** | TDEC-Environmental Protection Specialist 3
