Pollutant	Pounds/Hour			Tons/Year			Date of Data	Applicable Standard TAPCR 1200-03-
	Actual	Uncontrolled Potential	Allowable/ Permitted Potential	Actual	Uncontrolled Potential	Allowable/ Permitted Potential		
VOC <sup>[1]</sup>					502.85	491.4	3/30/2022	09-.01(4) 07-.07(2)
PM <sup>[2]</sup>	2.16	2.16	3.00	6.22	9.46	9.90	3/30/2022	07-.01(5)

1. VOC emissions are uncontrolled and are based on the data in Page 36 of the application (3/30/22). The facility has agreed to limit (through recordkeeping and good work practice standards) VOC emissions to 491.4 tons per any period of 12-consecutive months. The emission limit is based on an agreement letter dated July 18, 2022, from the permittee.

2. PM emissions are uncontrolled and are based on the data in Page 37 of the application (3/30/22). The regulatory allowable limit (TAPCR 1200-03-07-.03(1)) for PM is 46.29 lb/hr. The facility has agreed to limit (through recordkeeping) PM emissions to 3.00 lb/hr and 9.90 tons per year based on an agreement letter dated July 18, 2022, from the permittee.

The actual TPY is based on the facility's operating hours of 5,760 hr/yr from APC 10 form in the application (3/30/22).
