Re: Construction Permit Application
S & S Firewood LLC
245 Red Hawk Lane, Winchester, TN, 37398
Emission Source Reference No. 26-0217-02/Log No. 80265

Dear Mr. Strickland:

The Division received your construction permit application for a Steam Heated wood-dried kiln #1 on April 8, 2022. The information which you provided has undergone a preliminary review by the permit program.

It has been determined that the Steam Heated wood-dried kiln #1 described in your application would constitute an *insignificant activity* or *insignificant emissions unit*, as defined in part 1200-03-09-.04(2)(a)3. of the Tennessee Air Pollution Control Regulations. Specifically, this operation would result in potential emissions from this source of less than five tons per year of each air contaminant and each regulated air pollutant that is not a hazardous air pollutant, and less than 1,000 pounds per year of each hazardous air pollutant.

Subparagraph 1200-03-09-.04(4)(a) of the Tennessee Air Pollution Control Regulations allows an existing source to receive designation as an insignificant emissions unit at any time. Therefore, the referenced source will not require a permit at this time. All applicable air pollution control regulations must still be met by your facility.

If you have any questions concerning this correspondence, please contact Ms. Elizabeth Terranova at 865-594-2404 or elizabeth.terranova@tn.gov. Your Facility ID is **26-0217**, please reference this number in any further correspondence with the Division.

Sincerely,

James P. Johnston, P.E.
Deputy Director
Permitting & Regulatory Development
