Good morning, Joshua,

The solvent spray usage is sporadic as we don't routinely use that anymore. At the most it would be 8 hours a day.

The over spray is 25%. I thought that is what I put in the report. Is that what is in the report?

Mark

[EXTERNAL]

Thank you Mark. Are the solvent based spray booth usage numbers also based on a 16 hour operating day (Application submitted Jan. 25th)?

Also, I wrote down that the powder coating booths have a 25% overspray based on our last conversation. Could you confirm?

Thanks,

Joshua Rhoads

Good afternoon, Joshua,

Those numbers are actual for 16 hours of operation.

Good Morning Mark,

I was looking at the powder coating usage and was hoping you could clarify the daily average use. Are those numbers based on actual usage during a typical 8 hour operating day or is it based on 24 hours of operation?

Thank you,
Joshua Rhoads
