Cleveland, TN 37320

Re: 06-0056-01
63328

Dear Mr. Prine:

On January 22, 2010, you submitted a permit application to construct/modify three steam generators boilers. In a letter dated February 19, 2010 you were informed that your construction permit application(s) was incomplete. Under the provisions of Division rule 1200-3-26-.02(4)(d)2, applicants are allowed 180 days after receipt of initial notification to correct application deficiencies. Since you did not provide the required corrections by August 18, 2010, your permit is hereby denied and any processing fees are forfeited.

Please note that any source which is constructed/modified or operated without a valid permit is in violation of Rule 1200-3-9-.01 and/or Rule 1200-3-9-.02, respectively.

Based on the information provided in your application, it appears that you may have constructed an air contaminant source without first obtaining a permit to construct and/or a permit to operate. Because of this potential noncompliance that appears to be present at your facility, you are requested to provide the required information described in the letter of February 19, 2010 (copy enclosed) within fifteen (15) days of your receipt of this letter. Failure to provide this information in a timely fashion will necessitate the forwarding of this matter to the Division of Air Pollution Control's Enforcement Program for action deemed proper to resolve the potential noncompliance.

Mr. Jeff Prine

When the required information is received, your application will be reactivated and processed as a construction permit application. If it is determined that you have violated the permitting requirements of the Division, a Notice of Violation will be issued and the matter will be referred to the Enforcement Program.

If you have any questions concerning this correspondence, please contact Will Collins at (615) 532-9198.

Sincerely,

Randall Thompson, Chief
Middle Tennessee Permit Program
