Air Quality Analysis Performed? Yes ☐ No ☒

Briefly describe the project: (new source, modifications) (what the process is) (type controls proposed) (emissions expected, qualitative) (replacing what sources) (background information)

This is an existing source that wants to permit several portable crushers, conveyors, screens, and associated equipment to be used interchangeably at the site. Some of this equipment has been tested at other locations. Wet Suppression Systems are used for pollution control. This source is subject to federal regulations under the Standards of Performance (NSPS) for Nonmetallic Minerals Plants, 40 CFR Part 60, Subpart OOO. The Visible emission evaluation tests would be required to assure compliance with the applicable NSPS air quality standards.
