US Nitrogen LLC / Yara North America, Inc. / Linde Inc.
471 Pottertown Road, Midway, TN 37809
Emission Source Reference No. 30-0248-22/Log No. 82180

Dear Mr. Charles:

The Division received your insign activity/exemption permit application for a temporary 48.6 MMBtu/hr boiler on February 23, 2024. The information which you provided has undergone a preliminary review by the permit program.

It has been determined that the temporary 48.6 MMBtu/hr boiler described in your application would constitute an *insignificant activity* or *insignificant emissions unit*, as defined in part 1200-03-09-.04(2)(a)3 of the Tennessee Air Pollution Control Regulations (TAPCR). Specifically, this operation would result in potential emissions from this source of less than five tons per year of each air contaminant and each regulated air pollutant that is not a hazardous air pollutant, and less than 1,000 pounds per year of each hazardous air pollutant. Based on information in your application, this boiler shall not be operated for more than 60 days total at your facility.

Subparagraph 1200-03-09-.04(4)(a) of TAPCR requires that the request for designation as an insignificant emission unit be made at least 30 days prior to the estimated starting date of construction. Your application is accepted as the required notification. All applicable air pollution regulations must still be met by your facility.

If you have any questions concerning this correspondence, please contact Mr. Greg Forte at (615) 532-0548 or Greg.Forte@tn.gov. Your Facility ID is **30-0248**, please reference this number in any further correspondence with the Division.

Sincerely,

James P. Johnston, P.E.
Deputy Director
Permitting & Regulatory Development
