Re: M & R Station #59223
06-0298-01 / log 966662

Dear Mr. Mayces:

This correspondence is in response to your letter and attachments dated October 24, 2012. The information which you provided has undergone a preliminary review by the permit program.

It has been determined that the new metering station described in your letter and attachments would constitute an *insignificant activity* or *insignificant emissions unit*, as defined in parts 1200-03-09-.04(4) and 1200-03-09-.04(5) of the Tennessee Air Pollution Control Regulations. Specifically, the proposed operation would result in potential emissions from the source of less than five (5) tons per year of each air contaminant and each regulated air pollutant that is not a hazardous air pollutant, and less than 1,000 pounds per year of each hazardous air pollutant.

For new sources, subparagraph 1200-03-09-.04(4)(a) of the Tennessee Air Pollution Control Regulations requires that the request for designation as an insignificant emissions unit be made at least thirty (30) days prior to the estimated starting date of construction. Your letter is accepted as the required notification. All applicable air pollution regulations must still be met by your facility.

If you have any questions concerning this correspondence, please contact Elizabeth A. Keen at (615) 532-9200.

Sincerely,

Randall Thompson, Chief
Middle Tennessee Permit Program
