Section 5. Project Schedule (fill in information and check appropriate boxes)		
Proposed start date: 2-14-22 Estimated end date: may end		
Is any portion of the activity complete now?		
If yes, describe the extent of the completed portion:		
The required information in Sections 6-11 must be submitted on a separate sheet(s) and submitted in numbered format as presented below. If any question in not applicable, state the reason why it is not	n the sar applicab	ne lle.
Section 6. Description		Attached Yes No
6.1 A narrative description of the scope of the project		
6.2 USGS topographic map indicating the exact location of the project (can be a photographic copy)		
6.3 Photographs of the resource(s) proposed for alteration with location description (photo locations should be note map)	ed on	
A narrative description of the existing stream and/or wetland characteristics including, but not limited to, dimensional (e.g., depth, length, average width), substrate and riparian vegetation	sions	
A narrative description of the proposed stream and/or wetland characteristics including, but not limited to, dimensions (e.g., depth, length, average width), substrate and riparian vegetation		
6.6 In the case of wetlands, include a wetland delineation with delineation forms and site map denoting location of data points		
6.7 A copy of all hydrologic or jurisdictional determination documents issued for water resources on the project site		
Section 7. Project Rationale		Attached Yes No
Describe the need for the proposed activity, including, but not limited to the purpose, alternatives considered and rationale for selection of least impactful alternative, and what will be done to avoid or minimize impacts to water resource.	ces	
Section 8. Technical Information		Attached Yes No
Detailed plans, specifications, blueprints, or legible sketches of present site conditions and the proposed activity. Plans must be 8.5.x 11 inches. Additional larger plans may also be submitted to aid in application review. The detailed plans should be superimposed on existing and new conditions (e.g., stream cross sections where road crossings are proposed)	s	
For the proposed activity and compensatory mitigation, provide a discussion regarding the sequencing of events and construction methods and any proposed monitoring		
Depiction and narrative on the location and type of erosion prevention and sediment control (EPSC) measures to the proposed alterations and any other measures to treat, control, or manage impacts to waters	for	
Section 9. Water Resources Degradation (degree of proposed impact)		
Note that in most cases, activities that exceed the scope of the General Permit limitations are considered greater that degradation to water quality. Please provide your basis for concluding the proposed activity will cause one of the following levels of water quality as a De minimis degradation, no appreciable permanent loss of resource values b. Greater than de minimis degradation (if greater than de minimis complete Sections 10-11) For information and guidance on the definition of de minimis and degradation, refer to the Antidegradation Statement Chapter 0400-40-0306 of the Tennessee Water Quality Criteria Rule: https://publications.tnsosfiles.com/rules/0400/0400-40/0400-40.htm For more information on specifics on what General Permits can cover, refer to the Natural Resources Unit webpage a https://www.tn.gov/environment/permit-permits/water-permits1/aquatic-resource-alteration-permit-araphtml	uality deg
