Commissioner David Selyers, P.E.

TN Dept. of Environment & Conservation

312 Rosa Parks Blvd. TN Tower, 2nd Floor

Nashville, TN 37243

RECEIVED

Dear Commissioner -

JUN - 2 2023

ENVIRONMENT AND CONSERVATION
COMMISSIONER'S OFFICE

I am writing to support permit application # IN0082576, by the Water Authority of Dickson County. I reside in Dickson County.

I applaud WADC for extending a helping hand to the surrounding counties. I dislike the negative attention towards Dickson County & WADC. I wish both groups would come to a mutual agreement that allows growth in Dickson, Hickman, and western Williamson counties, but does not cost astronomical amounts.

Spending more money to extend the water treatment to Cumberland River is excessive spending and delaying economic impact, resulting in loss of money.

Growth is inevitable, Commissioner. I know you are aware of this. You also know that land is one thing man can't make any more of. Land can be preserved, is it possible for both sides to get accommodations they want? Is it possible to encourage and allow growth, and still build a treatment facility? There has got to be a better way.
