Voicemail Transcriptions in Opposition to Permit No. TN0082376
December 15 – May 18

May 18

- Yes, my name is Tom crook. I have a 260 Acre Farm on the Duck River in Marshall County. Just before it enters Murray County. I'm very much opposed and this is a absolute treasure to have such a diverse river in North America and we have to go to the ends of the Earth to protect it. I know, you know progress wants, you know. Two or treatment plants, but they have got to find another way to treat their sewage other than dumping it into the Duck River as treated sewage. Thank you.

May 16

- Hi, my name is Jessica Byers my family my grandparents live in the different County area and I'm just calling it to make my stance against the water treatment being dumped into the creek. I think it's very important that we conserve that Creek. It was a huge part of my growing up and it would be a real tragedy to have that turn into. I don't think around pretty much. Thanks. That's pretty much all I have y'all. Have a good day, bye-bye.
- Hi, my name is Lori Jobe watts and I'm calling to take my objections to the water treatment plant dumping influent into Lake Creek. you know for ecological reasons and and The quality of life honestly, Lick Creek is over 50 miles long and has multiple branches and streams that Branch from it. And of course dumps into the Duck River. Which oh my gosh is huge. So it's silly there has to be a better way. There just has to be so I would love it if the permit was denied and some other way was found to. To take care of what is clearly a human need. But I think is maybe taking advantage of a system a water system. That would be ecologically harmed and in a myriad of ways. Down down the line. Not just Lick Creek, but down the line. So, thank you.

May 15

- My name is Beatrice Joe. My husband is Neil Jobe. and we live beside Lick Creek, it actually borders our farm on three sides and we are very concerned about the fact that dicks and Water Authority wants to use it for their effluent from a new sewage plant that we don't see needs to be built in Hickman County. So we're we are grateful that you have denied that petition at this point. And we pray that you will continue. We look forward to the meeting with you on May 25th. We definitely oppose this measure. That Dixon is trying to do. Thank you. I think so. I'm going to I'm going to write a letter now.

May 1

- Yes. Hello, this is Cheryl Chester and my husband Thomas and I are residents of Hickman County and we are calling to state that we are in opposition to the water authority of Dickson County's plans to build a sewage treatment plant in Hickman County. That would be discharged into Lick Creek. Please please deny this permit. We strongly oppose this proposal Hickman County should not be responsible for other counties waste. Thank you.

April 30

- Yes, I'd like to oppose the water authority of Dickson County. To build a sewage plant dumping into the loot Creek. We like to fish and canoe that Creek. It's beautiful. It's

Christine. And not to mention we would not want any Wastewater being. Dumped into that reservoir of water. My name is Jackie Carroll, and I am a resident of Murray County. in the Bethel community Thank you, bye-bye.

April 10

- Hi, this is Linda cotton. I live in Murray County and I would like to support. tidex proposal to deny wadc's application to build a sewage treatment plan. Thank you very much for your work on this. Thank you, bye-bye.

April 6

- Commissioner. My name is Marsha Elliott, and I have been following wadc pretty close closely since I'm one of those people with some autoimmune diseases. And I strongly support this. I guess we can say your proposing to deny the application to build a sewage treatment plant in Hixson County with a fluent discharge into the creek and I would still like to have that happen for Public Safety. Thank you. Let me know if you want any more details about my thoughts. 615-218-1701.
- Yes, this is Stuart Moore. land in Hickman County with two Creeks on my property that drain into liquid. I want to say thank you for proposing to deny. Water Authority addictions application to build a sewage treatment planting with a fluent discharge and to lick Creek the the people of Hickman County should have the final say so. in the destiny of their lives their County their environment all those things and I believe that you folks over there today realize that and I applaud you for doing the right thing. Thank you so much.

February 21

- Hello, my name is Beatrice job, and I'm calling to express our disapproval my husband and mine. On the plans to build a Water Filtration plant in East Hickman and to the reclaimed water into Lick Creek. We are surrounded on three sides of our farm by this Creek and it has provided much pleasure and enjoyment to ourselves. and to many many other people we all so have a well that is very close to the creek and it already is contaminated when the creek floods. So I fear that we will be out of the water source when if this happens goes through. So please asking you to oppose this proposal that Dixon Water Authority. Thank you very much.

January 17

- Yes, sir. I don't believe that y'all should allow another County. To bring their sewage and another County sewage into Hickman County and use us as their Dumping Ground. We're okay at this point and where at some point will have to have our own build our own septic system sewer system or something but to allow them another County. To bring their sewage and then get another County that their contracted with and use it to dump in our county is just not right. You have that County coming in our County. Condemning our condemning our lands and doing what they want to and we don't have any Governors over there. That shouldn't happen. the that's just wrong. And I strongly oppose that and please don't let that happen if they if they are in that business let Williamson County take care of theirs. Let Dixon County take care of theirs and just leave it at that. Let them find a way to do it without coming here. In Hickman County and dumping all their sewer here. Thank you for your time. Thank you.

January 9

- This is Charles Nash and I live on the banks Lake Creek. I got a riding a full Cooper. Holler. I live at the mouth of it where empty Center Lake Creek in my home about nearly a mile up the creek. And my well, I got a well and if that is about probably only about 60 foot deep and it's about on the level of the creek. and that would that's my water supply only water supply of God that will and if that that Creek is polluted while I won't have no water. That's one of my biggest concerns and I hate to see it messed up because it's been I've been living on this Creek for 72 years. Now, have a good day. Bye.
- Yes, this is Abraham Haines of the Leatherwood Community. I'm very much concerned about this dumping this waste into the Lick Creek. I post very much. So I fished and waited that stream many times and it does not need any pollution or any kind of addition of unwanted water. and that's just not needed. It's a they can find somewhere. They need to find somewhere else that don't their their stuff. So anyway, appreciate it if it don't happen. Thanks.
- Yes, my name is Terry Sawyer s a w y e r. And my property owner in Hickman County 105 Columbia Avenue in Centerville. I'm very opposed to the pollution of Lake Creek and very opposed to the Sewer discharge into that Creek. So I would like to be listed as a citizen that is speaking up in favor of stopping. the the proposal by the Dixon water Council Anyway, if you do need to reach me. My phone number is 615-3808-8288. I plan to write a letter to the Tennessee Department of environment conservation in this regard also Thanks very much for your efforts in this and I hope that it's successful in blocking. this pollution in Hickman County Thanks very much, bye-bye.

January 6

- Hi, my name is Emily Crawford. And I am calling to oppose the wastewater treatment facility that would dump millions of gallons into Lick Creek because of the very special and unique and dangerous species there and also because it burdens a rural and Poor community at the over richer and more developed communities like Williamson and Davidson counties. So, this is in reference to permit applicant wadc. The tracking number is tn0082376. Thank you.

January 1

- Commissioner we do not need this disgusting plant. We do not. You do not need to serve other counties. We need clean water. Thank you.

December 31

- If I just moved here because of the waters The Creeks the beautiful country and this is nuts having to do that for our our low income community.
- Why can't Dickson County and Williamson County both pollute their own Creek? Y'all are taking advantage of a poor County right now. And this is just atrocious. How can people sleep in their own beds with the clear conscious other than greed. Y'all think about what's going to fix and let happen our kids that live in this creating plate in this Creek forever. And you're just going to think it's okay for somebody to come in pollute it and destroy a creek. Let him use his own damn water. Thank you for your consideration.

December 29

- It's just wrong to take it out of County sewage and bring it to our backyards and not even tell us where you're going to imminent domain our property or US citizens. We

should be treated with respect. I don't think it's right and you need to do something about it or be replaced by somebody that will

- I am opposed to the sewer plant going in and Hickman County because of the damage that it'll do to Lick Creek and also. To the infrastructure and the maintenance and the support of everything that it entails. Thank you.

December 28

- Yes, this is Scott Berg or 615-3530-573. Why are we still hearing about Lick Creek getting polluted? That's Dixon County. They need to take care of their own stuff. We don't want their crap in our land. You got my number call me the Publix tired of dealing with this stuff. It should have been over a long time ago. Take care of it.

December 24

- This is Beatrice Joe, and I'm calling regarding Saylick Creek. I understand that a new petition has been filed and they still proposing that a plant B. Built in Hickman County and at the water be discharged into Lick Creek. I'm adamantly opposed to that because I am three sides by the creek and my Arwell is about a hundred feet from the creek? And we know that that will contaminate our well water and we would just be great if you will reconsider or this proposal. And definitely vote against it. Thank you so much.

December 21

- Hello, my name is Tracy Store, and we are residents of Hickman County and we are calling to express a continued to express our concern and just absolute opposition to the water treatment facility, Williamson County. Is planning sorry Dickson County is planning to put in to service sticks and then Williamson County. We believe that County should be contained within their own boundaries all the treatment plants and all the infrastructure should be within that County not used by other counties, so we are completely opposed and our number is 920-202-0510. We've written we've called we continue to reach out and ask that this would be stopped. Thank you very much, bye-bye.

December 19

- Hello, my name is Robert Longo. I've been a long time resident Middle, Tennessee over 45 years. I love Lake Creek raise my children on it. I do not want to see a degraded. Please. Do not allow the Dixon water authority to pollute it. Tell them to spend their money wisely in another direction. Thank you very much.
- My commissioner, my name is Elizabeth Armstrong. I live at 7502 Cherokee Hills Road in Fairview, Tennessee. I'm calling to ask you to deny WADC's request for building a plant that will discharge into Lick Creek from number 100082376. WADC is being a moral and a responsible by trying to build a new plant instead of upkeeping their existing plants. I want better service and clean your water for what I pay WADC for Lake Creek is extremely important to keeping the Duck River alive, and it is responsibility to protect the environment and our water quality. Please remember how high profile the Duck River should be given that it is so bad diverse with many threatened and endangered and endemic species. Also remember Hickman is a recreation and agricultural economy residents of their entire way of life for their community. Please say no to this permanent application and advise WADC to repair their leaky pipes instead of building a new facility

anywhere because that's a stupid idea that disrespects everybody including the people. There are already servicing. WDC should also invest in better treatment for their existing plants because the white wolf plant is horse crap at their job and it all comes down to leadership not knowing or caring how to properly spend money. Please pick up for us commissioner and guide wadc in the right direction by denying this permit and Advising restorative action. Thank you. Have a great day.

December 15

- Hi, my name is Courtney Alexander, and I was just calling to express my opposition to the proposed Wastewater Plant on Lick Creek. If there's anything else you all need for me, my number is 615-545-1410. Thank you so much, bye-bye.
