Visible Emissions Report

Dear Mr. Ownby:

The purpose of this letter is to acknowledge receipt of and respond to the quarterly report of daily visible emissions determinations by EPA Method 9 for Gerdau AmeriSteel. Condition E4-10. of the currently effective permit (# 558867) requires these reports. The submitted report covers the third quarter of 2013.

The assessment of the report indicated that the minimum number of daily visible emissions readings was recorded for the quarter of data addressed by this letter. In addition, the report evaluation denoted that there was no time periods of excess emissions were reported from either of the three monitored emission points and the company can certify so in the annual certification of compliance.

Should you have any questions concerning the matters addressed by this letter, please contact either Ms. Erin Tays at (615) 532-0597 or me at (615) 532-0605.

Sincerely,

A handwritten signature in black ink, reading "Jeryl W. Stewart", is written over the typed name.
