Nashville Ready Mix

Attn: Mr. Minter

Good afternoon. Attached is the draft air quality permit regarding the Columbia concrete plant for you to review and to provide feedback if necessary concerning this permit upon receipt. Please review it within about a week's time (before June 3) and contact me if you have any questions or comments at your earliest convenience. The approval of the draft in its current form can be confirmed with the reply of "no comments" where afterwards an official copy of your permit will be issued to you following a final review by the Division of Air Pollution Control (APC).

If there are any other inquiries concerning this correspondence, feel free contact me at your convenience.

Sincerely:

Jimmie L. Horton | Environmental Protection Specialist

Division of Air Pollution Control
