Subject: Operating Status and Pressure Drop Data for Permit #978408

Good morning,

I am following up on Condition S1-4 of your construction permit #978408. The condition reads, in part:

- a) The permittee shall install a pressure gauge to measure the pressure drop (inches of water) across the dust collector. Upon startup of this source, the permittee shall compile 30 consecutive operating days of pressure drop readings across the dust collector. The designated person(s) shall note any relevant dust collector conditions/problems/concerns when recording the values.
- b) The pressure drop data, including a proposed minimum pressure drop value, shall be submitted to the Division no later than 15 days after completion of the readings. The data shall be submitted to the following Division site address or email address:

While the startup certification, for startup date April 18, 2021, was received by the Division, no pressure drop data has been received. Has the facility operated for a total of 30 days, and if so was the pressure drop data submitted to the Division?

Thank you,
