Re: ACC Review (57-0189)

Dear Mr. Ownby:

The Tennessee Division of Air Pollution Control received the original Annual Compliance Certification (ACC) for Gerdau Ameristeel US, Inc. that covers the period of January 1 – December 31, 2013 on January 8, 2014.

No deviations were referenced in the original ACC; however; one deviation was noted during my review of the Semi-Annual Report (SAR) for the period of July 1 – December 31, 2013. A pressure drop value of 0 was listed in Log 7 for November 25, 2013. I contacted you on January 14 and suggested that a revised ACC, which referenced the November 25th deviation be submitted to EPA Region IV as well as the Tennessee Division of Air Pollution Control.

A revised ACC dated January 14, 2014 was received by the Division of Air Pollution Control on January 15, 2014. This ACC referenced the November 25th deviation as requested. Therefore, both the original and the revised ACC were received prior to the March 1, 2014 deadline set forth in Title V operating permit 558867.

Based on the above-referenced facts, the revised report was deemed adequate to determine compliance. No issues of non-compliance were noted during the review of this report. In the future, please list all deviations in the associated SAR and ACC. If you have questions regarding the review of these reports or any other matter, please feel free to contact me at (731) 512-1336.

Sincerely,

Brad Garrett
Field Office Manager
TN Division of Air Pollution Control
