Re: Construction Permit Application / Insignificant Activity
Colgate-Palmolive Company
200 Centennial Court, Morristown, TN 37813
Facility ID 32-0238
Emission Source Reference No. 32-0238-08/ Log 78408

Dear Mr. Dils:

Your construction permit application for the weighing tote dump station was received on July 27, 2020. The application included a mixing vessel/ tank associated with the weighing tote dump station. The application identified the mixing tank which is used to blend charcoal and sorbitol as an insignificant activity. The information which you provided has undergone a preliminary review by the permit program.

It has been determined that the charcoal-sorbitol mixing tank described in your application would constitute an *insignificant activity* or *insignificant emissions unit*, as defined in part 1200-03-09-.04(2)(a)3. of the Tennessee Air Pollution Control Regulations. Specifically, this operation would result in potential emissions from the mixing tank of less than five tons per year of each air contaminant and each regulated air pollutant that is not a hazardous air pollutant, and less than 1,000 pounds per year of each hazardous air pollutant.

Subparagraph 1200-03-09-.04(4)(a) of the Tennessee Air Pollution Control Regulations requires that the request for designation as an insignificant emission unit be made at least 30 days prior to the estimated starting date of construction. Your application for the mixing tank and weighing tote dump station is accepted as the required notification. Therefore, the mixing tank will not require a permit at this time. All applicable air pollution control regulations must still be met for this emissions unit.

If you have any questions concerning this correspondence, please contact Mr. John Trimmer at (615) 532-0552 or John.Trimmer@tn.gov. Your Facility ID is **32-0238**; please reference this number in any further correspondence with the Division.

Sincerely,

A handwritten signature in blue ink, appearing to read "James P. Johnston".

James P. Johnston, P.E.
