Re: Construction Permit Application
260 Dennis Street, Athens, TN, 37303
Emission Source Reference No. 54-0047-15 & 16/Log No. 73711

Dear Mr. Gilreath:

The Division received your construction permit application for a 6.275 MMBTU/hr natural gas fired boiler at source 15 and a 6.275 MMBTU/hr natural gas fired boiler at Source 16 on January 18, 2018. The information which you provided has undergone a preliminary review by the permit program.

It has been determined that the two (2) 6.275 MMBTU/hr boilers described in your application would constitute *insignificant activities* or *insignificant emissions units*, as defined in part 1200-03-09-.04(2)(a)3. of the Tennessee Air Pollution Control Regulations. Specifically, these operations would result in potential emissions from each source of less than five (5) tons per year of each air contaminant and each regulated air pollutant that is not a hazardous air pollutant, and less than 1,000 pounds per year of each hazardous air pollutant.

Subparagraph 1200-03-09-.04(4)(a) of the Tennessee Air Pollution Control Regulations requires that the request for designation as an insignificant emission unit be made at least thirty (30) days prior to the estimated starting date of construction. Your application is accepted as the required notification. All applicable air pollution regulations must still be met by your facility.

If you have any questions concerning this correspondence, please contact Mr. Jerry Swinea at (615) 532-0639 or Jerry.Swinea@tn.gov. Your Facility ID is **54-0047**, please reference this number in any further correspondence with the Division.

Sincerely,

James P. Johnston, P.E.
Deputy Director
Permitting & Regulatory Development
