Emission Source Reference No. 39-0057-06, 39-0057-26/Permit No. 077696

Dear Mr. Phillips,

Your operating permit application dated November 5, 2019, for the plastic resin recycling operations was received on November 7, 2019. Additional information was received on April 7, 2020, and November 16, 2023. The information which you provided has undergone a preliminary review by the permit program.

It has been determined that the following sources described in your application would each constitute an *insignificant activity* or *insignificant emissions unit*, as defined in part 1200-03-09-.04(2)(a)3 of the Tennessee Air Pollution Control Regulations (TAPCR):

- Source 06 – Rubber Extrusion Lines #3 & 4A
- Source 26 – Work Cells w/ Adhesive Applicators

Specifically, each of these operations would result in potential emissions from this source of less than five tons per year of each air contaminant and each regulated air pollutant that is not a hazardous air pollutant, and less than 1,000 pounds per year of each hazardous air pollutant.

Subparagraph 1200-03-09-.04(4)(a) of TAPCR allows an existing source to receive designation as an insignificant emissions unit at any time. Therefore, the referenced source will not require a permit at this time. All applicable air pollution control regulations must still be met by your facility.

If you have any questions concerning this correspondence, please contact Ms. Katherine Stephens at (615) 532-0564 or Katherine.Stephens@tn.gov. Your Facility ID is **39-0057**, please reference this number in any further correspondence with the Division.

Sincerely,

James P. Johnston, P.E.
Deputy Director
Permitting & Regulatory Development
