RE: Operating Permit # 456744
Change in Emission Sources (Waste Paper Collection Cyclone) Source # 32-0028-03

December 1, 2011

Mr. Trimmer,

International Paper in Morristown, TN has purchased a piece of equipment (paper waste collection cyclone) that will replace an existing paper waste collection cyclone that is listed on our Operating Permit # 456744, source # 32-0028-03.

Pollutants emitted: Particulate Matter (TSP) – International Paper expects no increase of emissions from this source.

Approximate date of change: December 23rd, 2011

Reason for Air Permit Change: International Paper Morristown is <u>replacing</u> an old cyclone with a newer model that will be placed in a different location in the plant.

International Paper declares that the equipment change <u>does not</u> result in emissions exceeding the emissions allowable under the existing operating permit.

If you have any questions, please do not hesitate to call.

Mike Thompson
