RE: Permit Agreement Letter  
Dynamic Recycling  
220 North Industrial Drive Bristol, Tennessee 37620  
Emission Source Reference No. 82-1020/ Permit No.981211

Dear Ms. Owenby:

On behalf of Dynamic Recycling the following permit limitations are agreed upon for the ethanol reclamation operation located at the above referenced facility:

- Individual Hazardous Air Pollutants [HAPs] emitted by this facility shall not exceed 9.9 tons during any period of 12-consecutive months.
- Volatile Organic Compounds [VOC] emitted by this facility shall not exceed 99 tons during any period of 12-consecutive months. The VOC emission limitation was taken to avoid Prevention of Significant Air Quality Deterioration (PSD).
- The stated production rate for this facility is 6 million gallons per year of 200 proof alcohol.

Dynamic Recycling shall demonstrate compliance with these limitations by maintaining a log of monthly and annual ethanol production in gallons. AP-42 emissions factors identified in the air permit application will be utilized to determine emissions from ethanol production.

Should you have any questions or require additional information, please contact Brian Potter via phone at 276-698-5941 or via e-mail at [brianp@mxinc.com](mailto:brianp@mxinc.com)

On behalf of Dynamic Recycling, I agree to the above limitations. I am authorized to represent and bind the facility in environmental affairs.
