Mr. Sutton,

The Division is in receipt of the startup certifications for sources 01 and 02 from permit 980251.

Please ensure that you also submit an operating permit application for these sources within 30 days of startup per condition G6 of the construction permit. This is generally accomplished by completing

and submitting a signed APC100 application form requesting an operating permit, provided there were no changes to the source as described in the initial construction application. An APC100 is attached for your convenience.

Let me know if you have any questions.
