Subject: RE: Lexington Air Permit

Good afternoon all,

I have incorporated the agreement into the Conditional Major version of the permit for your review. Please provide any questions, comments, or concerns on the draft permit by end of day Friday, March 22nd.

Thank you,
Katherine

Subject: RE: Lexington Air Permit

Good morning all,

I have approval from my senior engineer for the new permit, so we are now at the next step of updating the agreement letter for the Conditional Major limit. I have attached an example letter that includes your current limits on the boiler and the new limits on CS2 from vulcanizing. You may draft your own letter if you prefer, and you may make changes to any of the limits. I am happy to discuss if needed. The signed letter should be sent to Air.Pollution.Control@tn.gov with me copied. Please send it in by end of day Tuesday the 19th, or let me know if you need more time.

Sincerely,
Katherine

P.S. Timeline:

- ~~New application forms submitted [FRS]~~
- ~~Draft a conditional major permit to reflect the forms [APC]~~
- ~~Internal review process [APC]~~
- ~~Revised agreement letter [FRS]~~

- Permit draft with agreement sent for approval from FRS and Terri Ledsinger [APC] <- **current step**
- Issue permit [APC]

Subject: RE: Lexington Air Permit

Good morning all,

I received the new application forms, so right now I'm working on the new permit and getting feedback from my senior engineer. I will reach out once it's ready and send you an example agreement letter. Thanks for checking in!

Sincerely,
Katherine

P.S. For reference, the timeline I'm working on:

- ~~New application forms submitted [FRS]~~
- ~~Draft a conditional major permit to reflect the forms [APC]~~
- Internal review process [APC] <- **current step**
- Revised agreement letter [FRS, but APC would again provide a suggestion/template]
 - This agreement letter would now have to include a limitation that would bring emissions of CS2 below 10 TPY
 - Per our discussion, the easiest way for FRS to do this would be taking a limit on raw rubber material input, most likely 30,000,000 total, tracked by purchase
- Permit draft sent for approval from FRS and Terri Ledsinger [APC]
- Issue permit [APC]
