RE: Response Regarding Gasoline Dispensing Activities
Chestnut Ridge Landfill, Heiskell, Tennessee
Emission Source Reference No.: 01-0170
Title V Operating Permit No.: 578427

Dear Mr. King,

The purpose of this letter is to confirm that Chestnut Ridge Landfill does not operate an established gasoline dispensing facility on site, but instead uses only small handheld gasoline containers when needed. No bulk gasoline tank is on-site, and quantities of gasoline are typically limited to fewer than 80 gallons per month. This quantity is dispensed from a 5-gallon (or similarly sized) hand-held containers. Gasoline is used for small maintenance machinery and limited support activities at the site. Good housekeeping practices are observed.

As requested per email from TDEC on March 27, 2024, this confirmation letter is submitted to explain the relevant activities performed and the clearly limited quantities involved. The following federal air quality regulations apply to Chestnut Ridge Landfill:

40 CFR 61 Subpart M: Asbestos
40 CFR 62 Subpart 000: MSWL
40 CFR 60 Subpart JJJJ: Engines
40 CFR 63 Subpart AAAA: MSWL
40 CFR 63 Subpart ZZZZ: Engines

Statement of Title V Truth and Accuracy by Responsible Official:

"I have reviewed this document in its entirety, and to the best of my knowledge, based on information and belief formed after reasonable inquiry, the statements and information contained in this document are true, accurate, and complete".

Don Gentilcore, Director of Disposal Operations

If you have any comments or questions regarding this submittal, please contact me at (615) 242-8322.

Respectfully Submitted,
Chestnut Ridge Landfill

Joy C. Inman
Environmental Protection Manager
