Mr. Will Ownby
Environmental Manager
Gerdau AmeriSteel U.S. Inc.
Jackson Tennessee Steel Mill
P.O. Box 10848
Jackson, TN 38308

Reference Number: 57-0189-02

Dear Mr. Ownby:

The Tennessee Division of Air Pollution Control has received the quarterly report of daily visible emissions evaluations (VEEs) conducted for the Gerdau AmeriSteel – Jackson Tennessee Steel Mill. This report was submitted in conformance with Condition E5-2 of the currently effective permit (Title V permit No. 574449) for the facility. The submitted report addressed data for the first and second quarters of 2022.

The Division's Compliance Validation Program has reviewed the VEE reports. Based on this review, the Division considers the reports technically correct and acceptable for a determination of compliance.

The reports indicated that the minimum number of daily VEEs or greater were recorded for each monitored emission point for both quarters of data addressed by this letter. In addition, there were no time periods of excess emissions reported from any of the three monitored emission points, therefore the company has met the requirements outlined in Title V permit No. 574449.

Should you have any questions concerning the evaluation of this report, please contact either Garrett Ammons at (615) 687-7076 or me at (615) 687-7037.

Sincerely,

A handwritten signature in blue ink that reads "Bryan Parker".
